

PORTABLE DRYING SYSTEM

Drying Facilities

The fully equipped workshop situated at the Carlton-in-Lindrick, Worksop site provides the opportunity for SHL Refractories (UK) Ltd. to offer a total package to its customers.

Not only by the production of various types of pre-cast items in the workshop but also providing essential back up to the SHL installation services on customers sites.

With its own drying facilities installed to meet most of the drying requirements for work carried out (which includes, various pre-cast shapes, tundishes, ladles, chimney sections and even complete furnaces) the workshop can supply a project with the refractory lining fully dried and ready for service on the customer's site.

The drying facilities include a fully automatic drying oven capable of holding items up to approximately 6 metres long and a portable drying system which offers a more versatile alternative for the various projects undertaken.

With these two systems available in the workshop SHL Refractories (UK) Ltd are able to provide the precise temperature control to achieve the accurate drying temperature profiles required to maximise refractory performance.

SHL Refractories (UK) Ltd. has many years experience of refractories in various industries and would appreciate the opportunity to tender for your existing and future requirements.
